## Letter of Promulgation

This letter promulgates the eighth edition of the Federal Radionavigation Plan, which was prepared jointly by the Departments of Defense and Transportation. It supersedes the 1992 Federal Radionavigation Plan.

The Federal Radionavigation Plan is published to provide information on the management of those Federally provided radionavigation systems used by both the military and civil sectors. It supports the planning, programming and implementing of air, marine, land and space navigation systems to meet the requirements shown in the President's budget submission to Congress. This plan is the official source of radionavigation policy and planning for the Federal Government, and has been prepared with the assistance of other Government agencies. The Federal Radionavigation Plan is revised biennially. Your suggestions for the improvement of future editions are welcomed.

13. ABSTRACT (Maximum 200 words)  The Federal Radionavigation Plan (FRP) delineates policies and plans for radionavigation services provided by the U.S. Government to ensure efficient use of resources and full protection of national interests. Developed jointly by the U.S. Departments of Defense and Transportation, the FRP sets forth the Federal interagency approach to the implementation and operation of radionavigation systems.  The FRP is updated biennially. This eighth edition describes respective areas of authority and responsibility, and provides a management structure by which the individual operating agencies will define and meet requirements in a cost-effective manner. Moreover, this edition contains the current policy on the radionavigation systems mix. The constantly changing radionavigation user profile and rapid advancements in systems technology, require that the FRP remain as dynamic as the issues it addresses. This edition of the FRP builds on the foundation laid by previous editions and further develops national plans towards providing an optimum mix of radionavigation systems for the foreseeable future.

## Preface

The Department of Defense (DOD) and the Department of Transportation (DOT) have developed the eighth edition of the Federal Radionavigation Plan (FRP) to ensure full protection of national interests and efficient use of resources. The plan sets forth the Federal interagency approach to the implementation and operation of Federally provided, common-use (civil and military) radionavigation systems.

The FRP is a review of existing and planned radionavigation systems used in air, space, land, and marine navigation and for purposes other than navigation in terms of user requirements and current status. The FRP contents reflect DOD responsibility for national security, as well as DOT responsibilities for public safety and transportation economy.

The plan is updated biennially. The established DOD/DOT interagency management approach allows continuing control and review of U.S. radionavigation systems. Your inputs for the next edition of this plan are welcome. Interested parties and advisory groups from the private sector are invited to submit their inputs to the Chairman of the DOT Positioning and Navigation (POS/NAV) Working Group (Attn: OST/P-7), Department of Transportation, Office of the Assistant Secretary for Transportation Policy, Washington, DC 20590.

Public radionavigation user conferences that will provide radionavigation system users the opportunity to comment on this document are planned to be held in late 1995 or early 1996.
